10:00 - 11:00 a.m. (CST)

Click here to register.

Please note that we will email all registered participants a Zoom link prior to each session.

Administered through the school's University of Regina campus and delivered primarily online, the Master of Health Administration (MHA) program focuses on building leadership, management, and policy capacity for current, emerging and future health sector leaders. While in program, students develop the knowledge and skills that are required of professionals and managers in the health field, enabling them to contribute to improving the effectiveness of program and policy development, implementation and evaluation, as well as effectiveness in health service delivery, and managerial and administrative performance.

Within the MHA program, students can major in Health Informatics and Information Management (HIIM), which encompasses a wide scope of practice that includes information management, information systems, information technology, and finance areas.

Connect with us **via Zoom** to hear from our MHA program faculty and student advisor.
