

## **GOVERNANCE - PROFESSIONAL DEVELOPMENT**

## THE ROLE OF THE CEO IN PUBLIC SECTOR GOVERNANCE

Finding the right balance between the board and the CEO of a public sector entity can be challenging. With the complexity of Cabinet Ministers, ministry officials, demands from clients, community members and potentially individual members of the board the task may seem all consuming leaving nothing for managing operations.

Join us for a workshop that will explore the role of the board, the role of the CEO and senior management, strategies to address demands of stakeholders and those feeling the need to cross over into day to day operational issues. The session will include tips on finding the right balance allowing you to work effectively with the board in a non-confrontational way.

This session is designed for current CEOs as well as those aspiring to the role of CEO or any senior level management personnel.

## STEWARDSHIP IN ACTION

As board members we are entrusted with the careful care and protection of the entities we govern. In these uncertain times, our responsibilities as stewards may require us to adapt quickly and take decisive action in the face of major financial, operational and strategic challenges. In today's ambiguous and nebulous environment we must move beyond yesterday's status quo to be effective stewards.

Join us to discuss practical approaches to enacting stewardship in public sector boards. Learn more about how to be ready to adjust your organization's strategic plan, business model, or approach to service delivery to allow it to survive and thrive. You will be given the opportunity to survey risks to your board and consider strategies for effective stewardship in the face of these challenges.

Thursday, October 15, 2020 9:00 a.m. - 12:00 p.m. Zoom Session

in addition to asynchronous online training materials including videos and interactive content Thursday, December 3, 2020 9:00 a.m. - 11:30 a.m. Zoom Session
